

OVERVIEW

DOCUTRACK is the industry leading pharmacy workflow and document management system for pharmacies. Capable of handling small to large, single or multiple site pharmacies, DOCUTRACK is currently deployed in over 250 pharmacies nationwide and is in use by more than 5,000 end users. With over 100 million documents processed to date, DOCUTRACK has a proven record of helping pharmacies reduce costs, enhance compliance, increase productivity and improve customer service.

Integra is unique from many pharmacy software providers. When developing our products we focus on optimizing their functionality within the healthcare industry. Pharmacy operators will not find cross-over products at Integra, but rather innovative tailored systems that fit seamlessly into your current processes. Built for healthcare market, we can provide full functionality for closed-door, mail-order, specialty care, correctional, DME/HME and retail pharmacies.

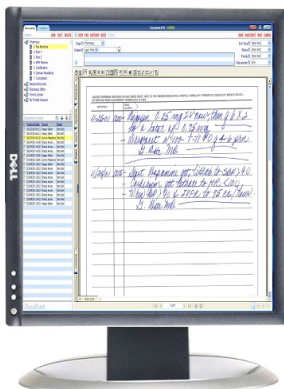

WHAT DOCUTRACK CAN DO FOR YOU

DOCUTRACK is an innovative pharmacy workflow and document management system designed to electronically store, organize, route and retrieve healthcare documents.

Pharmacies equipped with DOCUTRACK can electronically process all incoming physician orders, refills and other paperwork associated with filling a prescription.

DOCUTRACK tightly interfaces with many pharmacy information systems allowing for seamless integration.

DOCUTRACK also enables multi-site pharmacies to centralize core functions in hub-and-spoke business models and consolidate departments.

DocuTRACK

RELIABLE, AFFORDABLE, INTEGRATED

HOW IT WORKS

STEP ONE - Receive Documents

- DOCUTRACK includes an integrated fax-server which handles all incoming and outgoing faxes.
- Documents can also be placed into DOCUTRACK by e-mail, scanner or network folders.

STEP TWO - Organize Documents

- Received documents are instantly organized by source and date received and delivered to the first step of your workflow.
- Multiple users can simultaneously access each workflow step and process documents based on the rules you create.
- Seamless integration into your processes allows documents to be indexed by info retrieved from your pharmacy system.

STEP THREE - Manage Documents

- DOCUTRACK can manage any document type, whether pharmacy, HME order, medical record or business office related.
- Electronic forms can be used with DOCUTRACK such as Prior Authorizations and Therapeutic Interchanges. Forms can be automatically completed electronically and faxed without having to leave your computer.
- Secure access to DOCUTRACK from outside the pharmacy, enabling remote functionality and centralized order processing.

STEP FOUR - Retrieve Documents

- DOCUTRACK integrates with any pharmacy information system, as well as DeliveryTrack and various delivery service companies.
- Simple commands offer easy lookup of any document such as prescriptions, order history or delivery manifests.

KEY BENEFITS

- Increase staff productivity by:
 - Reducing time needed to sort and file documents
 - All sorting, filing and processing becomes virtual
 - Forms can be filled out electronically and faxed w/o leaving your workstation
- Improve customer service:
 - Customer concerns can be answered immediately with simple document lookup
 - Errors are minimized
- Eliminate nearly all paper and paper related costs including:
 - Storage space
 - Paper and filing materials
 - Ink and toner
 - Staff time to handle paper processing
- Interface with nearly all major pharmacy information systems
- Increase security through streamlined or centralized operations
- Create and track pharmacy workflow
