

MED-PASS, Integra and DocuTrack

Optimizing your DocuTrack Investment

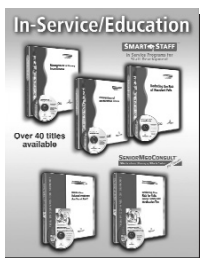

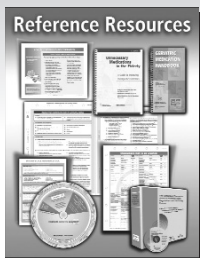

The DocuTrack system makes electronic versions of documents available for use throughout the pharmacy. All you need is the DocuTrack module and compatible bar codes on the documents nursing homes fax to your pharmacy.

MED-PASS DocuTrack Compatible Bar Coded Forms

In response to requests at the 2010 Integra Meeting, MED-PASS has added DocuTrack compatible bar codes to a much wider variety of forms:

- Physicians Order Forms*
- Medication (Administration) Records*
- Treatment Records*
- Physicians Order/Medication Records Combo Forms* (bar codes on PF portion and MR portion are unique so PF and MR can be routed to different stations in the pharmacy)
- Physicians Telephone Orders
- Medication Order/Reorder/Communication Forms
- IV Catheter POF/MR Forms
- Controlled Drug Records

* **MED-PASS** carries stock laser and continuous feed printer versions compatible with all major pharmacy software systems that include QS/1, SoftWriters, Transaction Data and many more. **Sample forms packets will be available at the meeting.**
