

DocuTrack Real-Time Viewer

The **DocuTrack Real-Time Viewer** enables two different web based portals that allow you to track documents in your workflow and view triggered alerts. These viewers are typically displayed on a monitor or projected on a wall to help your staff better manage their time. Some pharmacies have even purchased third-party screen savers that allow the viewers to be displayed on inactive computer monitors. Both viewers can be customized with predefined themes as well as choosing what content will be displayed.

KEY BENEFITS

Real-Time Status Viewer

The Real-Time Status Viewer gives an overview of where documents are within the current workflow. It monitors up to seven different search folders by showing the number of documents in each folder using a histogram format. At a glance, your staff can determine what areas of the workflow need attention allowing them to better manage their time. While the initial intent of this feature was to allow the pharmacy to make an impact on potential customers, it quickly becomes indispensable in day-to-day operations.

Alert Name	Alert Details
2day old docs exist in clarif.	1) Aging: There is at least one item in 'Pharmacy - 5 Clarification' that has not been processed in 2 days.
Documents need to be triaged	1) Threshold: There are more than 14 items in the 'Pharmacy - 1 Fax Machine'. A total of 15 items currently exist in the queue.
Documents need to be verified	1) Threshold: There are more than 10 items in the 'Pharmacy - 1 Fax Machine'. A total of 15 items currently exist in the queue.

Real-Time Alert Viewer

The Real-Time Alert Viewer displays the currently triggered alerts within your DocuTrack system. Alerts can be created to monitor every aspect of your workflow as well as the conditions of your DocuTrack server. For example, you can set up an alert to monitor STAT orders that have not been processed in a specified amount of time. Alerts can be hidden from the Real-Time Alert Viewer allowing granular control over what is displayed to your staff.

Features

- Monitor system alerts
- Track system workflow

Benefits

- Web based
- Finish orders in time
- Graphical display of alerts
- Complete workflow visibility

Other Modules

- Assistant
- Barcoding
- eRx
- Active Directory
- Direct Print
