

Document Imaging

Extend your pharmacy's document scanning capabilities beyond hard-copy prescriptions.

Scan and store driver's licenses, insurance cards, Medicare documentation, delivery tickets, shipping or any other document to create digital files and store them within your QS/1® NRx®, SystemOne® or PrimeCare® system. Retrieval is quick and easy.

Greater Efficiency

Creating digital documents eliminates time spent searching through paper files and filing cabinets. Documents can be saved with the patient, transaction, item or physician record for quick access. Plus, you'll recapture floor space and cut paper consumption.

Enhanced Compliance

Create a complete audit trail of paperwork that is organized and easily accessible. Scan required hard-copy documents like intake forms, hard copy prescriptions and insurance cards to create digital files and attach them to records within your QS/1 Pharmacy Management System.

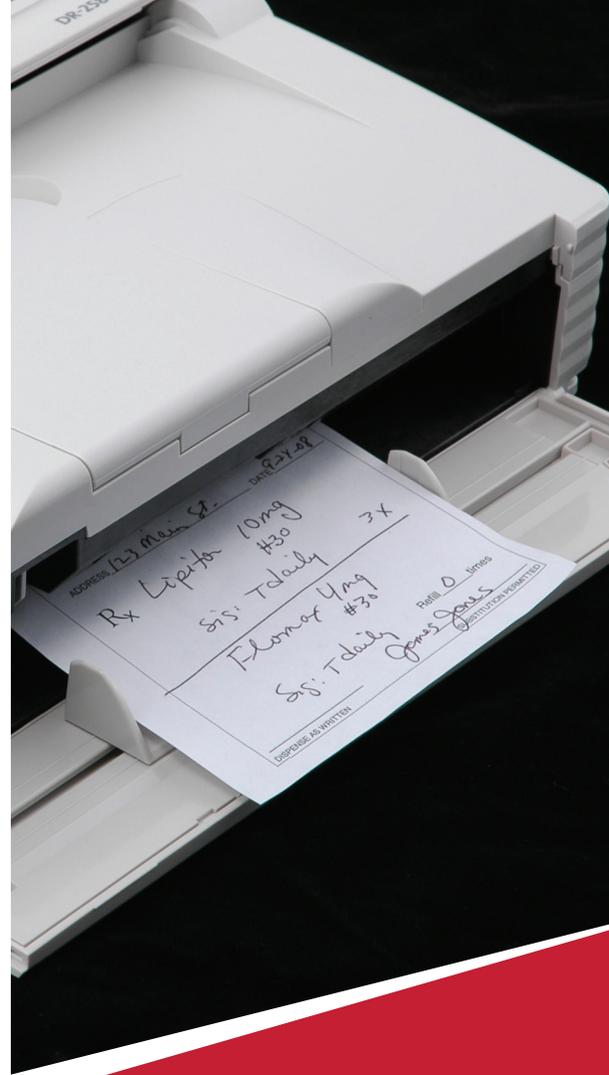

Advanced Security

QS/1 software has built-in security features so you can index, search, recall, view and print electronic documents without compromising patient privacy. Password protection enables you to assign different levels of access to documents. Security Journals enable you to log access by time, date and person.*

Imaging	
<ul style="list-style-type: none">▪ Scan and save electronic copies.▪ Save documents with patient, transaction, doctor or item records for easy access.	<ul style="list-style-type: none">▪ Scan, index, search, recall, view and print electronic copies as needed.

Safe and Secure	
<ul style="list-style-type: none">▪ Built-in security options help ensure HIPAA security compliance.▪ Restrict access to only authorized staff through password protection.	<ul style="list-style-type: none">▪ Track who made document changes and when.*

* Requires Security Journals to be enabled.

- Define documents and add new document types as needed.
- Scan and store digital copies of documentation directly to the drug, insurance, patient, prescriber, prescription or transaction records for easy access.
- Free floor space by eliminating bulky filing cabinets.
- Become more environmentally friendly by reducing paper consumption.
- Save time by eliminating the need to search through paper files.
- Enjoy quick access to digital documents as orders are processed.
- Identify documents by date scanned.
- Use security features to help ensure HIPAA compliance.
- Save electronic copies in appropriate areas for easy access.
- Choose from three types of scanners: a flat bed for non-paper items like insurance cards and driver's licenses, an upright for scanning two-sided documents in one pass or a combination scanner that does both.
