Business Intelligence

Mevesi enables efficient, data-driven decision-making. Trusted by hundreds of pharmacies, Mevesi analytics software converts your existing pharmacy system financials and accounting data into actionable information that will increase revenue, productivity, and profitability.

Unlimited Business Insight

Mevesi helps you maximize your profits by aggregating real-time metrics from already existing data sources such as prescription, drug pricing, accounting data, and much more.

Advanced Analytics

Take advantage of custom reports, dashboards, and scorecards to track and fine-tune your pharmacy's operations. Compare your financials by week, month, quarter, or year to determine where you can grow or improve performance.

Complete Flexibility

Intuitive report building and easy to use tools allow you to select, filter, compare, visualize, and analyze your aggregated data. Easily identify areas where you want to increase revenue, productivity, or both.

Decreased Costs

Quickly view your negative and positive margins and locate unpaid charges. Track high and low volume products for better inventory control and reduce on-hand inventory with real-time and historical information.

Easy Integration

Aggregate data from your existing pharmacy system and accounting software through pre-built interfaces or an easy to configure recurring file drop.

Forecasting

Ensure a secure future by forecasting prescription utilizations by patient, payer, product, or physician. Predict Rx revenue, purchase orders, new business, organic growth, and make proactive changes.

"You can identify anything that could be hurting your productivity or financials with Mevesi, as well as identify new avenues of possible revenue and productivity."

Rusty Lee, Senior Vice President of Ancillary Services – CHSGa
