Intelligent Patient Management

Manage your patient's continuum of care with an integrated care approach. Edge allows you to configure your workflow, queues, call scripts, and communication based on individual client needs. Enhance patient care, while increasing your revenue stream.

Integrated Intervention Management

Edge automates patient monitoring, pharmacist coordination, and patient education. Fully automate the care path for COPD, diabetes, hypertension, and high-risk patients. Send and receive notifications and updates based on other high risk conditions.

Enhanced Patient Engagement

Effectively involve your patients and partners in their healthcare routine through automated or scheduled communication. Send notices and reminders via text, email, fax, or phone.

Improved Care Pathways

Create comprehensive patient intervention including disease management, quality of life, plus drug education content, videos, and transcripts. Simplify that continuum of care with patient web and mobile applications.

Increased Compliance

Proactively use pharmacy data to create compliance reports and manage patient adherence. Utilize workflow capabilities to help achieve URAC compliance.

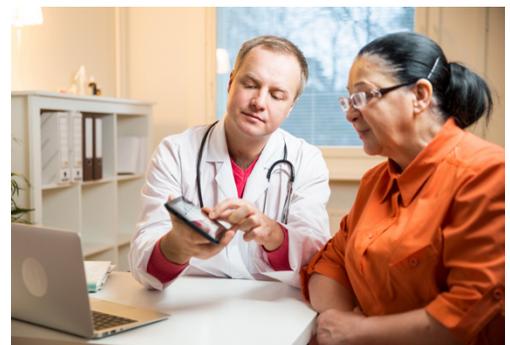

Communication Monitoring

Track and measure your outreach and report the results based on your parameters. Use this data to find the most effective ways to reach each individual.

Customer Retention

Edge's clinical engine enables automated assessments and custom-designed workflows tailored to each patients' exact needs. Patients receive extraordinary healthcare services based on their data, improving customer satisfaction and retention.

"I can see, and quickly evaluate, how many orders there are per patient. In just a few clicks you're down to the root. That ties back to consulting with the facility."

Rusty Lee, Senior Vice President of Ancillary Services – CHSGa
