

DocuTrack Direct Print

Direct Print is Integra's virtual print module, enabling remote printing from in or outside of your network. The module can be installed on any computer, allowing users to print documents directly into DocuTrack.

KEY BENEFITS

Easy to use, if someone can print a document on their computer, they can easily make use of this virtual printer to send documents seamlessly. Similar to "Print to PDF," DocuTrack's Direct Print Module outputs a file into DocuTrack that is formatted the same as the original document.

Highly configurable, businesses can set up unlimited instances to print directly to a specific department or user.

Fully HIPAA compliant, all virtually printed documents are stored securely in volatile computer memory and transmitted fully encrypted. Using some of the software industry's strongest encryption technologies, we can ensure a fully HIPAA compliant transaction.

Seamless adoption, unique printer identification allows DocuTrack end-users to identify where any document is printed from, similar to how they currently utilize fax numbers. This enables your pharmacy to capitalize on DocuTrack routing rules for further automation of your pharmacy processes.

Features

- Remote print into DocuTrack
- Add watermarks to documents
- Print reports from the pharmacy system
- Read active document text

Benefits

- Print from *any* enabled workstation
- Increase document routing options
- Reduce cost of physical printing
- Adhere to compliant transport protocol
- Take output from systems not on paper

Other Modules

- Assistant
- Barcoding
- eRx
- Active Directory
- Real-Time Viewer
