

PrimeCare®

Take Control of Your Pharmacy

Comprehensive Pharmacy Management

PrimeCare is the most flexible pharmacy management system on the market today – an integrated, scalable software solution that answers all the needs of institutional, long-term care, and combo-shop pharmacies. Streamline workflow, improve efficiency, get real-time reports, and ensure your pharmacy is operating at peak performance.

“Workflow is fantastic. The reporting is amazing. You’re able to control the system how you want to, instead of the system being run one particular way. It allows you to get very granular.”

James Branshaw, R.Ph., Owner,
Harbor Pharmacy

Billing Matrix

Free up your pharmacy staff with our industry-leading Billing Matrix. Automatically assign price plans and charge accounts based on the facility and track multiple pay status changes and concurrent coverage.

Extensive Interfaces

PrimeCare offers more than 200 interfaces in the institutional space that will help keep your pharmacy competitive. Choose from a variety of solutions and services that improve efficiency and enhance customer engagement.

Versatile Dispensing

Handle short-cycle dispensing with options for daily, 7-day, 14-day, and custom Fill Lists. When using unit-dose processing, PrimeCare Fill Lists enable you to use a variety of dispensing intervals and systems to separate filling and billing with different transaction dates to fit the needs of each individual facility.

Everything at a Glance

Gain valuable insight with Pharmacy at a Glance, which provides a real-time report of all activities underway. See where orders are in the process and identify any bottlenecks in the system.
