

DeliveryTrack[®]

Manage Your Pharmacy Logistics

Pharmacy Delivery Software

Manage your delivery process with compliant pharmacy delivery software. Advance your pharmacy delivery logistics from item validation and route optimization to signature capture, providing audit compliance and peace of mind.

"We went with DeliveryTrack because of its integration with DocuTrack. I type in the Rx number and can load all the documents associated with that Rx: the initial hard copy, who packed it, who checked it, who delivered it, who signed for it, and the date and time. And I can do that in just a matter of seconds."

Delivery Manager

Eliminate Uncertainty

Searchable proof of deliveries by tote, manifest, or Rx. DeliveryTrack customers see a reduction or complete elimination of proof of delivery related non-compliance fines. Track orders from start to finish and instantly access delivery manifests with signature, name, and signee role.

No Surprises During an Audit

DeliveryTrack pharmacy delivery software provides closed-loop integration and a full audit trail from order receipt to final proof of delivery, allowing the pharmacy to do full delivery manifest reconciliation.

See Every Delivery in One Place

View every item from start to delivery with real-time tracking. Answer order progress inquiries with confidence, recalculate delivery estimates on demand, and keep customers up to date instantly. Send automatic notifications to facilities after every completed delivery, including manifests and delivery confirmations.

Reduce Costs and Increase Accuracy

Save time, fuel, and money with enhanced routing. Automatically create optimized routes and get orders to your patients faster. We crunch the data, so you get better runs, routes, and scheduling for medication delivery.
