## RedSail Technologies® Announces Integration Between Axys® and American HealthTech®

**(Spartanburg, SC – 4/13/2023)** – [RedSail Technologies, LLC](#), developer of [Axys](#), is proud to announce the launch of its integration with [American HealthTech](#), a leading electronic health record (EHR) provider to post-acute and senior living organizations of all sizes. Providers gain the following benefits with interoperability over paper-based systems and standard interfaces.

**Eliminate waste. Reduce labor for handling orders. Reduce potential for error. Automate refills.**

This collaboration with American HealthTech is a win for pharmacists, care teams, and most importantly residents – with more accurate and on-time drug delivery. The increased efficiency and elimination of manual data entry will benefit skilled nursing facilities, assisted living facilities, and residential facilities. Increased automation will also decrease adverse drug events (ADEs). Now with interoperability between American HealthTech and Axys, providers can minimize data entry errors, boost accuracy, and gain an incremental step toward addressing ADEs. Coupled with efficiencies that result in lower costs, plus higher resident satisfaction through faster service, this integration results in attractive, multi-faceted ROI and demonstrates RedSail's commitment to clinical and financial success for its partners.

RedSail Technologies is currently scheduling future implementations of Axys. For more information and product demos, contact [sales@redsailtechnologies.com](mailto:sales@redsailtechnologies.com), or visit [www.integragroup.com/axys](http://www.integragroup.com/axys).
